sapphire-ball-lens

#### Specifications of Sapphire Ball Lens SBL86U

Code: SBL86U

Material: Optical grade single Sapphire crystal

Diameter: 8.6mm

Tolerance:  $\pm 0.005$ mm

Surface Quality S/D: 80/50

Clear Aperture: >90%

Sphericity: 0.005mm

Compressive Strength: 300,000 (psi)

Coating: AR coating

sapphire-windows-sapphire-lens

Sapphire Balls Features and Applications:

1. High transparent to wavelengths of light between 0.3  $\mu\text{m}$  (UV) and 5  $\mu\text{m}$  (IR),
2. Extremely hard and resistant to attack by strong acid.
3. Highly resistant to scratching.
4. Extremely high melting temperature (2030°C).
5. Suitable for the applications of fiber optic connectors, flow meters, rotameters, and bar code scanners.

Custom Specifications of Sapphire Ball Lens:

Diameters: 1 mm to 150mm

Diameters tolerance: +/- 0.001mm

Roundness: < 0.003

Surface quality: Up to 20/10

Surfaces accuracy: <  $2\lambda$

Clear aperture: > 90%

Sphericity: Up to 0.6 $\mu$ m

Coating: AR coating
